Jan Patrick Matayabas

Davao, Philippines / github.com/janpatmat / patmatayabas@gmail.com / 09763822220

I'm a seasoned web developer with deep expertise in modern frontend frameworks, primarily working with React, Next.js, and Vue.js. On the backend, I bring strong skills in both Node.js and Laravel, allowing me to build robust, full-stack applications. Beyond development, I have a solid understanding of DevOps practices, including automation, CI/CD, and containerization. I'm experienced with tools and technologies like Jenkins, Docker, Python, Linux, and AWS, which I use to streamline deployment workflows and ensure scalable, reliable infrastructure

/* WORK EXPERIENCE */

## ZENITH SOLUTIONS

Front End Developer / Jun 2024 - Aug 2024

Developed a responsive website that is optimized for both desktop and mobile devices using NextJS

NextJS typescript tailwindcss
ARISEN LABS

Full Stack Developer / Mar 2023 - May 2024

Created a RESTful API that allowed for seamless integration with other applications using VueJS and Laravel, while also deploying the website through a dedicate VPS

VueJS Laravel docker apache nginx ubuntu phpmyadmin
/* PROJECTS */

ADDUTOCART

Front End developer / Dec 2023 - Jan 2024

addutocart.addu.edu.ph / github.com/SAMAHANSysDev/addu-to-cart

Addu-to-cart was an e-commerce website where it bridges a small business to their own page. My role there was a front end developer converting UX/UI designs to a website along with a team. The website has now been taken down due to the limit of hosting of the server

⚛ ReactJS 𝟛 css 🅑 bootstrap

SAMAHAN WEBSITE SY 22-23

Front End developer / Apr 2022 - May 2022

samahan.addu.edu.ph

The requires a website for the student government of their school that would provide information about the organization and their events. They also wanted a dedicated web page for the freshmen students. The website should follow the current theme of the student government in terms of color, vibe, and fonts.

SAMAHAN CONSTI-NATIN-TO PLEBISCITE

Full Stack Developer / Jan 2023 - Jan 2023

github.com/SAMAHAN-Systems-Development/SAMAHAN-Consti-web

The Plebiscite was simply a website that asks for the opinions of the user of the proposed amendments of the school. With a simple design and the use of a database, we were able to achieve the website

Ⓝ NestJS 🅰 axios 🟢 nodeJS 🔥 firebase 🄵 firestore
SADYA 2022 WEBSITE

Front End developer / Jul 2022 - Aug 2022

sadya2022.addu.edu.ph

The project is about developing a website that would serve as a single source of information about Ateneo de Davao University Fiesta 2022, featuring details such as the schedule, programs, and venue. Furthermore, the website should showcase the events taking place each day, along with a live feed of tweets related to the event, and registration links for various activities. The website has been taken down due to the limit of hosted websites
