JAN PATRICK MATAYABAS

Software Engineer

Davao City, Philippines | 0976 382 2220 | patmatayabas@gmail.com | janpatmat.github.io/Portfolio

SUMMARY

Software Engineer with 3+ years of experience building full-stack web and mobile applications, from enterprise outage-monitoring platforms for conglomerate clients to AI-powered products. Skilled in Next.js, Flutter, FastAPI, retrieval-augmented generation (RAG), and AWS, with a strong focus on secure, scalable API design. Seeking to build reliable, AI-enabled software that solves real operational problems for a growing engineering team.

WORK EXPERIENCE

Software Engineer | Appwardtech — Dec 2025 – Present

- Develop **enterprise-level applications that monitor service outages region-wide**, giving large conglomerate clients real-time visibility into disruptions across their service areas.
- Build and maintain production infrastructure on **AWS (EC2, S3, Amplify)** to deploy, host, and scale client applications.
- Secure API endpoints and design services for scalability, applying security best practices across the stack.
- Accelerate feature delivery with **agentic AI development using Claude** while keeping code secure and maintainable.

Full Stack Developer | K Steak Unlimited — Dec 2025 – Jan 2026

- Built a complete **point-of-sale (POS) system** with **Next.js, PostgreSQL, and a REST API backend**, deployed on the company's own local server.
- Designed a modular, scalable architecture so an **inventory module can be added** without reworking the core system.

Frontend Developer | Imagine Web LLC — Jun 2025 – Sep 2025

- Built and launched client websites with **WordPress and Elementor**, delivering each site **within one month**.
- Designed page layouts and visual assets using **Adobe Photoshop and Lightroom**.

Freelance Frontend Developer | Zenith Solutions — Jun 2024 – Aug 2024

- Developed a **mobile-responsive** company website with **TypeScript and Next.js** to showcase the company's services.
- Tracked tasks and deliverables in **Jira** using project management practices.

Full Stack Developer | Arisen Labs — Mar 2023 – Aug 2024

- Built full-stack web apps with **Vue.js and Laravel**, deployed via **NGINX, Docker**, and third-party hosting.
- **Digitized a manual pledge-tracking process** into an automated system for recording and monitoring pledges.

PROJECTS

AI-Powered Social Calendar (Mobile App) | *Flutter*, *FastAPI*, *AI*

- Built a calendar app that uses AI to **turn plain-language to-dos into scheduled events** automatically.
- Added shared schedules so friends can view each other's availability and book time directly, **removing the guesswork** of planning around someone else's schedule.

AI Consultant-Matching Directory (Web) | *RAG*, *AI*

- Built a consultant directory with a **RAG-powered AI assistant** that matches clients to the right consultants from a natural-language description of their needs.
- Replaced manual browsing with **conversational search**, making it faster for clients to find a qualified consultant.

Innovate International Philippines Website | *Next.js* | innovateinternationalph.com

- Built the website for a Davao- and Manila-based solutions provider, with nine solution categories and product pages.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
Frameworks: Next.js, Flutter, FastAPI, Vue.js, Laravel
AI: Retrieval-Augmented Generation (RAG), agentic AI development (Claude), LLM integration
Cloud, DevOps & Data: AWS (EC2, S3, Amplify), Docker, NGINX, Linux, PostgreSQL, MySQL
Tools: Jira, WordPress, Adobe Photoshop

EDUCATION

Bachelor of Science in Information Technology | Ateneo de Davao University — Jun 2025

LEADERSHIP

Director (2023–2024) and **Developer** (2022–2023) | SAMAHAN Systems Development, Ateneo de Davao
